INCIDENT UPDATE REPORT #6

WEATHER SUMMARY

A powerful severe weather system produced a broken line of supercell thunderstorms and affected areas near and north of I-20 from 1 pm until approximately 1030 pm CDT on 3/19/18. This included numerous reports of quarter to baseball size hail, straight-line wind damage, flash flooding and tornadoes. The most intense damage was located near and north of I-20, and near and east of I-65, but damage also occurred in the northwest sections of the state. NWS storm survey teams have confirmed (5) tornado touchdowns across the state at this time. Teams are continuing to perform storm surveys today.

STATE RESPONSE ACTIONS
