

DR-4406-AL Public Notice 001

Date of Notice:

Tuesday, December 18, 2018

The Federal Emergency Management Agency (FEMA) hereby gives notice to the public of its intent to reimburse eligible applicants for eligible costs to repair or replace facilities damaged by Hurricane Michael that occurred in certain areas of the State of Alabama during the incident period that began on October 10, 2018 and ended October 13, 2018. This notice applies to the Public Assistance (PA) and Hazard Mitigation Grant Program (HMGP) implemented under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. § 5121-5207.

Under a major disaster declaration FEMA-4406-DR-AL signed by the President on November 5, 2018, the following counties in the State of Alabama have been designated adversely affected by the disaster and eligible for PA Category B only: Dale County and PA Categories A-G: Geneva, Henry, Houston, and Mobile counties. Additional counties may be designated at a later date without further public notice. HMGP is available statewide.

This public notice concerns activities that may affect historic properties, activities that are located in or affect wetland areas or the 100-year floodplain, and critical actions within the 500-year floodplain. Such activities may adversely affect the historic property and floodplain or wetland, or may result in continuing vulnerability to flood damage.

Presidential Executive Orders 11988 and 11990 require that all federal actions located in or affecting the floodplain or wetlands be reviewed for opportunities to relocate, and evaluated for social, economic, historical, environmental, legal, accessibility, and safety considerations. Where there isn't an opportunity to relocate, FEMA is required to undertake a detailed review to determine what

measures may be taken to minimize future damages. The public is invited to participate in the process of identifying alternatives and analyzing their impacts.

FEMA has determined that for certain types of facilities there aren't normally alternatives to restoration in the floodplain or wetland. These are facilities that meet all of the following criteria: 1) FEMA's estimate of the cost of repairs is less than 50 percent of the cost to replace the entire facility and is less than \$100,000; 2) the facility is not located in a floodway; 3) the facility has not sustained major structural damage in a previous Presidentially declared flooding disaster or emergency; and 4) the facility is not critical (e.g., the facility is not a hospital, generating plant, emergency operations center, or a facility that contains dangerous materials). FEMA intends to provide assistance for the restoration of these facilities to their pre-disaster condition, except that certain measures to mitigate the effect of future flooding, other hazards, and accessibility requirements may be included in the work. For example, a bridge or culvert restoration may include a larger waterway opening to decrease the risk of future washouts.

For routine activities, this will be the only public notice provided. Other activities and those involving facilities that do not meet the four criteria above are required to undergo more detailed review, including the study of alternate locations. Subsequent public notices regarding such projects will be published, if necessary, as more specific information becomes available.

In many cases, an applicant may have started facility restoration before federal involvement. Even if the facility must undergo detailed review and analysis of alternate locations, FEMA will fund eligible restoration at the original location if the facility is functionally dependent on its floodplain location (e.g., bridges and flood control facilities), the project facilitates an open space use, or the facility is an integral part of a larger network that is impractical or uneconomical to relocate, such as a road. In such cases, FEMA must also examine the possible effects of not restoring the facility, minimizing floodplain or wetland impacts, and determining both that an overriding public need for the facility clearly outweighs the Executive Order requirements to avoid the floodplain or wetland, and that the site is the only practicable alternative. State and local officials will confirm to

FEMA that proposed actions comply with all applicable state and local floodplain management and wetland protection requirements.

FEMA also intends to provide HMGP funding to the State of Alabama to mitigate future disaster damages. These projects may include construction of new facilities, modification of existing undamaged facilities, relocation of facilities out of floodplains, demolition of structures, or other types of projects to mitigate future disaster damages. In the course of developing project proposals, subsequent public notices will be published, if necessary, as more specific information becomes available.

The National Historic Preservation Act requires federal agencies to take into account the effect of their undertakings on historic properties. Those actions or activities affecting buildings, structures, districts or objects 50 years or older, or that affect archeological sites or undisturbed ground, will require further review to determine if the property is eligible for listing in the National Register of Historic Places (Register). If the property is determined to be eligible for the Register and FEMA's undertaking will adversely affect it, FEMA will provide additional public notices. For historic properties not adversely affected by FEMA's undertaking, this will be the only public notice.

The Rehabilitation Act of 1973 protects the civil rights of persons with disabilities. It prohibits discrimination on the basis of disability by the federal government, federal contractors, and by recipients of federal financial assistance. Any recipient or sub-recipient of federal funds is required to make their programs accessible to individuals with disabilities. Its protections apply to all programs and businesses that receive any federal funds and applies to all elements of physical/architectural, programmatic and communication accessibility in all services and activities conducted by or funded by FEMA. FEMA intends to comply with the Rehabilitation Act in all federally conducted and assisted programs in alignment with the principals of whole community inclusion and universal accessibility.

As noted, this may be the only public notice regarding the above-described actions under the PA and HMGP programs. Interested persons may obtain

information about these actions or a specific project by writing to the U.S. Department of Homeland Security, Federal Emergency Management Agency – Region IV - EHP, 3003 Chamblee Tucker Rd, Atlanta, GA 30341-4112 or via email to FEMA-R4EHP@fema.dhs.gov. Please include in the subject line of the email, “DR-4406-AL EHAD”. Comments should be sent in writing at the above address within 15 days of the date of this notice.
